| N/A | Largest Contentful Paint element | 1 element found | ~ |
| N/A | Minimize main-thread work | Main-thread busy for 127ms | ~ |
| | | | |

What do these audits mean?

These audits are best practices established by Google to help build websites for optimal front-end performance.

Each audit is assessed based on your adherence to them and ordered by the most likely impact to your page's performance.

Note that Structure audits do not directly affect your Performance score, however addressing them can serve as good starting point to improve page load times overall. Additionally, some of the audits are correlated and thus, fixing one audit may affect others.
